LinkedIn Profile: <https://www.linkedin.com/in/nitesh-kesarkar-4b923694/>

Objective:

To be the one who could understand, analyze and provide the best solution by use of the latest technologies available within the customer's budget. Also, lead or be part of the enthusiastic team working passionately to meet common objectives and grow together.

IT Skills:

Technologies	: HTML, CSS, Javascript, TypeScript, PHP, SQL
Databases	: Firebase, MySQL, MongoDB.
Operating Systems	: MacOS, Windows 11/10/8/7, Ubuntu 18.04.
Other Tools	: Azure DevOps, Docker, GitHub CI-CD, SonarCloud, Git, BitBucker, Jira
Frameworks	: Angular, React, NodeJs, ExpressJS, Laravel, Joomla, OpenCart, jQuery, Vue.js, Bootstrap, Angular Material, Tailwind, Semantic UI.

Experience:

1. Team Lead - Senior Frontend Developer

[CodeBlaze Solutions Pvt Ltd, Pune](#)

Aug 2023 to Now (1 Year and 5+ Months)

ShipWatch & Vemon:

From August 2023, Initially I was working with Vemon project which was a admin and data entry portal for vessel management. And then on ShipWatch which is the subscription based product for vessel management. ShipWatch has dashboards and benchmarking for better understanding of the fuel management in the shipping industry.

Engine:

Engine is a platform to help the customers for fuel procurement. It helps them with the good quality, fuel availability and lower price ranges for fuels. Currently working as a **Team Lead** for Engine, managing the team of 8 people including FE, BE and UI/UX developers. Working with Agile project management.

2. Senior Software Engineer (Web UI Developer)

[Globant India Pvt. Ltd. Pune](#)

July 2021 to Aug 2023 (2 Year and 2+ Months)

Disney:

From August 2021 till March 2022, I am working with a Disney account under the Groot team. Here I am responsible for managing the header, footer, and global messaging section of various brands like - DisneyWorld, Disneyland, DisneyCruise, HongKongDisneyLand, Disney Aulani, and ShanghaiDisneyResort. I am also taking care of any UI defects or enhancements received. The tech stack is PHP, Zend Framework, React, and Angular.

UIEngineering Studio:

Along with that in Globant, I am contributing to the UI Engineering studio. Initially to Performance offering and now to gRPC offering. I am working with the UIE studio for the POC's development for respective offerings. Recently started working on Preact POC related to email templating. Given a talk on gRPC along with the team in Google I/O Extended 2022. Given a similar talk in the Tech Insider event for UI studio. Received "Pat on the Back" award. The tech stack explored - Angular, React, Preact, gRPC.

VMWare:

From March 2022 till August 2023, I am working with a VMWare account under the NXT team. I am responsible for the development of features in the portal provided for VMware cloud users to configure and deploy their servers. This project was initially built using AngularJs but has now been migrated to the Angular 12 version. I am responsible for adding new features, Migrating old features from AngularJS to the Angular 12 codebase. Bug fixing and any UI improvements.

3. Senior Software Engineer UI

[Infrd Pvt Ltd, Bengaluru](#)

Sept 2020 to July 2021 (9+ Months)

I was working with Infrd Pvt Ltd under the role of Senior Software Engineer UI. I am working with the HomeGenius team. A real estate brokerage firm helps buyers and sellers of the property to meet their goals. I am working on the front end of this project which is built in Angular 6. In between, I was also working with Infrd's product team named Intelligent Document Processing (IDP). Which works on document processing i.e. data extraction with the help of AI and ML. Here, I was responsible for managing the UI and the dashboard of the platform built in Angular 8.

4. Software Engineer

[Tekdi Technologies Pvt Ltd, Pune](#)

Nov 2019 to Sept 2020 (10 Months)

I was working with Tekdi Technologies Pvt Ltd as a Software Engineer. Initially, I was working with SocialAds and JTicketing which are the products of Techjoomla. Then I shifted to a client site in Bengaluru where I worked with the EkStep team on the VidyaDaan 2.0 project. On this project, I was working on the front-end part i.e in Angular 7. Ekstep team closely works with the CBSE and other State Boards for their digital e-learning platforms.

5. Software Developer

[Shivneri Systems Pvt Ltd, Ichalkaranji](#)

Dec 2017 to Nov 2019 (1 Year 11 Months)

In Shivneri Systems I was responsible for analyzing new client's requirements. Identifying the best technology stack that can be used to deliver the requirements. I worked on the back-end, front-end, and API development for most of the projects.

6. Junior Software Developer

[Tekdi Technologies Pvt Ltd, Pune](#)

Dec 2016 to Dec 2017 (1 Year)

I worked with Tekdi Technologies Pvt Ltd as a Junior Software Developer. Here initially I was working with the leave management web application and then Ekstep's education portal. Later, I

shifted to a client site in Bengaluru. Where I was working with the EkStep team for their open source education platform. It was one of the biggest projects I have ever worked on.

7. Trainee PHP Developer

[Tekdi Technologies Pvt Ltd, Pune](#)

June 2016 to Dec 2016 (6 Months)

I was undergoing training in Ram Krishna IT Consultancy Pvt Ltd in Pune as a Trainee PHP Developer for Tekdi Technologies Pvt Ltd. Here I had training in web development, communication skills & DBMS.

Projects:

ENGINE

(Angular 14, SCSS, Angular Material, Bootstrap)

ENGINE is a powerful marine fuel platform designed to simplify bunker procurement with data-driven insights. It offers an intuitive and user-friendly interface, helping users compare fuel prices, check availability, and assess quality to avoid off-spec fuel. The platform provides real-time updates and tools to reduce fuel costs and prevent procurement mistakes. ENGINE also supports supplier negotiations, allowing buyers to balance price, fuel quality, and availability for smarter purchasing decisions. Follow the link for more details - <https://engine.online/>

Ship-Watch

(Angular 18, SCSS, Tailwind, NgRx, RxJs, Leaflet)

Ship-Watch is an integrated platform that combines marine expertise with superior data analytics to enhance voyage execution, reduce costs, and improve transparency. EmissionsWatch allows users to simulate and forecast vessel ratings, helping owners track progress and generate precise reports for stakeholders instantly. The dashboard provides essential analytics for managing emissions and participating in the Carbon Credit market. Additionally, it monitors non-compliance and voyage misreporting, supporting operations teams with expert intervention from the Fleet Operations Centre to investigate and resolve issues. Follow the link for more details - <https://www.ship-watch.com/>

Intelligent Document Processing (IDP)

(Angular 6, SCSS, HTML5)

IDP platform automates data extraction from complex, unstructured documents. It helps enterprises drive process innovation by removing manual processing bottlenecks and automating data extraction from documents. Our clients significantly lower their process costs, reduce process cycle times, improve scalability, and enhance their end-to-end business process performance.

Follow the link for more details - <https://www.infrd.ai/>

HomeGenius

(Angular 6, SCSS, HTML5)

Homegenius combines the on-the-ground knowledge of our experienced Advisors with proprietary tools and data that help today's homebuyers and sellers achieve their goals. Radian, HomeGenius's parent company, is ensuring the American dream of homeownership responsibly and sustainably through products and services that include industry-leading mortgage insurance and a comprehensive

suite of mortgage, risk, real estate, and title services.
Follow the link for more details - <https://homegenius.com/>

VidyaDaan 2.0

(Angular 7, SCSS, HTML5, Semantic UI)

This national program is a call to the nation, particularly individuals & organizations across the country to contribute e-learning resources in the education domain to ensure that quality learning continues for learners across India.

Follow the link for more details - <https://vdm.diksha.gov.in>.

Project Sunbird

(Angularjs, CSS, HTML5, Bootstrap)

Project Sunbird is a suite of open-source software, built on a highly scalable modern tech stack, which enables solutions for lifelong learning. Which is used by many state boards of India like Maharashtra, Rajasthan, Karnataka, and also the CBSE board. I was working with the sunbird portal team. I worked on the initial announcement module of this project.

Follow the link for more details - <https://github.com/project-sunbird>.

Ekstep Learning Platform

(Joomla, jQuery, CSS, HTML5, Bootstrap, Javascript)

An open learning platform with a collection of learning resources in literacy & numeracy. I was working on the bug fixes initially, and then worked on analytics datasets, dictionaries, searches & filters of the site.

Follow the link for more details - <https://www.ekstep.in>

School Portal

(Laravel, Vue.js, API, FCM, SMS Gateway, CSS, HTML5, Bootstrap)

School Portal 2.0 is a school management system. This reduces the teacher's efforts and time that they need to spend apart from teaching, managing the attendance, notices, results, and other academic tasks. Also, the parents can get instant updates for their children about their attendance, notices, leave requests, school events, results, and much more. I was working on back-end and API development.

Follow the link for more details - <https://www.youtube.com/watch?v=r30-so-GJZQ>

The Ichalkaranji Hardware

(Opencart, API, FCM, SMS Gateway, CSS, HTML5, Bootstrap)

TIH is a bulk order placing app specifically developed for The Ichalkaranji Hardware shop. Users can place & track orders instantly. Users will get SMS and FCM notifications after the order is placed and status modification. Admin will get email notifications on new order arrivals. I was working on back-end and API development.

Other/Extra/Demo Projects:

- **GameHub** - GameHub is a video game discovery web app that helps you find new and interesting games to play. With GameHub, you can search for games by platform, genre, and more.

[React, Tailwind CSS, HTML5, CSS3, JavaScript]

<https://game-hub-niteshpk.vercel.app/>

- **PromptBaba** - PromptBaba is an open-source AI prompting tool that helps you discover, create, and share creative prompts. With Next.js, NextAuth, and Google authentication, browse prompts by tags, usernames, and content, and copy or edit them with ease.
[React, Next.js, Tailwind CSS, HTML5, CSS3, JavaScript]
<https://prompt-baba-niteshpk.vercel.app/>
- **Number Converter** - Simple React client to convert the numbers given in one number system to another. Supported 13+ number conversions.
[React, Bootstrap5, HTML5, CSS3, JavaScript]
<https://number-converter-niteshpk.vercel.app/>
- **Receipts Generator** - Receipts Generator is a dynamic, user-friendly web application that simplifies the creation of rent and wifi receipts. With a clean, intuitive interface, it supports customization of receipts and offers the ability to export these receipts as PDFs.
[React, Bootstrap5, HTML5, CSS3, JavaScript]
<https://receipts-generator.vercel.app/>
- **Dr-Json** - A web app for JSON formatting and minifying with copy to clipboard functionality.
[React, Bootstrap5, HTML5, CSS3, JavaScript]
<https://dr-json-niteshpk.vercel.app/>
- **Amazing Footwears** - eCommerce shop with the user-facing site and admin panels.
[Angular 10, Firebase database, Firebase hosting]
<https://amazing-footwear-shop.web.app> - Admin Panel
<https://user-amazing-footwear-shop.web.app> - User Site
- **COVID-19 Tracker** - Covid-19 statistics tracking and showing in dashboard page
[React, react-chartjs-2, react-leaflet, Firebase hosting]
<https://covid-19-tracker-dcd00.web.app/>
